

Term 1 - Stingray and Starfish classes –
Creative Home learning: Amazing Amazon

For creative home learning this term, the children have a choice to **either** make a 3D model of an animal that lives in the Amazon which has a moving part in its design, **or** to use a box to create a rainforest, showing the types of plants and animals which inhabit a rainforest and its different layers. Some ideas are shown below, but please encourage the children to use their own research skills and use their amazing imaginations!
