

Year 6 Creative Homework

This term our enquiry question is, 'What has the heart got to do with it?' As part of this we will be looking at the organs in our body that keep us alive. Therefore we would like you to pick an organ and research lots of interesting facts about it. Have a go at presenting your project creatively; you might choose to create a 3D model, a presentation or a poster. This will be due in on the last Monday of term. We can not wait to see your designs!
